

Riyan Ahmad

Software Development Engineer — Backend & Cloud

riyanahmad99@gmail.com · github.com/dexterrxx31 · linkedin.com/in/riyanahmad

Backend engineer building broadcast & media pipelines at Evertz Microsystems — content workflows, WebSocket playlist management, and event-driven microservices on AWS. Contract-first API design with OpenAPI/AsyncAPI; reliability-focused for live television.

EXPERIENCE

Software Development Engineer 1 — Evertz Microsystems

Aug 2023 – Present

- Develop and maintain RESTful API endpoints, creating shared OpenAPI/AsyncAPI schemas and a centralized error-handling decorator to improve consistency and system stability.
- Led delivery of two high-priority features — an enhanced content registration workflow and a content purging system — both ahead of schedule.
- Built a playlist management feature for channels in a legacy Java Spring application using WebSocket APIs.
- Improved performance with versioned APIs and strengthened quality via schema validation and Mabl-based end-to-end automation.

Student Software Development Engineer — Evertz Microsystems

Feb 2023 – Aug 2023

- Developed API endpoints to retrieve media metadata and manage tags, improving data accessibility.
- Contributed features and bug fixes to core backend microservices — Content Service, Tag Service, Metadata Extraction.
- Worked extensively with serverless AWS services in a microservices architecture.

SKILLS

Languages: Python, Java, C, C++	Cloud/AWS: Lambda, S3, EC2, DynamoDB, API Gateway, CloudWatch, Step Functions
Frameworks: Spring, FastAPI, Django, Boto3	Data: MariaDB, DynamoDB
APIs: REST, WebSockets, OpenAPI, AsyncAPI	Tools: Mabl, Linux, Git, OOP, DSA, Computer Networks

EDUCATION

B.Tech, Electronics & Communication Engineering — JSS Academy of Technical Education, Noida

2019 – 2023

8.17 CGPA

ACHIEVEMENTS & ACTIVITY

- Led and delivered two high-priority features to the product team on schedule, demonstrating strong project management.
- Received consistent 4/5 ratings across the last four performance reviews for reliability and teamwork.
- Rapidly onboarded to a legacy Java Spring codebase and shipped a new feature with comprehensive test coverage.
- JSS-Quanta (ECE society), Embedded & Web Developer (2019–2023):** ran 5 workshops and 3 orientation programs engaging 600+ students in IoT & ML; built the society website with HTML/CSS/JS, Python, Arduino, NodeMCU, RFID.
